

3.2.5.1 Two Way Match/Three Way Match/Receiving Reports

Policy Statement
The University of Georgia is mandated by Executive Order of the Governor of the State of Georgia to pay invoices within 30 days from the latter of:

- Invoice date
- Date the invoice is received by the University of Georgia
- Date goods and/or services are received by the University of Georgia

The University of Georgia processes encumbered payments once a two-way or three-way match has been established. Accounts Payable is responsible for performing the two-way or three-way match.

The components of a two-way match are a valid, University issued purchase order and invoice. Two-way matching is applicable to purchase orders with a total dollar amount of $2499.99 or less that procure goods only.

The components of a three-way match are a valid, University issued purchase order, invoice, and receiving report documenting receipt of goods or services by the end user department, or Central Receiving, when goods have been delivered directly to Central Receiving. Three-way matching is applicable to purchase orders issued for goods with a total dollar amount of $2500.00 or more and all purchase orders issued for services (i.e. consulting services or any purchase order coded with detail object 72760 or any detail object code beginning with 75) regardless of dollar amount.

Receiving roles are assigned by the UGAmart administrator in Procurement.

Reason for policy
This policy is to document the University of Georgia’s matching process.

Procedures
When completing a receiving report is applicable under the three-way matching conditions outlined in the Policy Statement above, the following should occur:

- If a purchase order has been delivered to Central Receiving, a receiving report will be generated by Central Receiving.
- If a purchase order is delivered directly to the end user department, an individual with the receiving role assigned to them within UGAmart will need to create a receipt.

To create a receiving report, users should log into UGAmart and search for the applicable purchase order in the top right corner. A link to UGAmart is provided under the Related Information section. Once the purchase order displays, from the Available Actions dropdown menu, select “Create Quantity Receipt” and click “Go”. The receipt date will automatically default to the current date. This date should be updated to reflect the date that the goods were actually received. Click on the calendar icon to choose the correct date. Users should also enter the packing slip number and delivery information. This information is not required, but it is recommended that it be entered. Users should complete the receiving report information with the appropriate quantities, and click on the “Save Updates” icon on the right above the header information. Once the updates have been saved, the system will allow a review of the draft before
the user completes the receiving report. Once the receipt is complete, the user should click the “Complete” icon. A complete receiving guide with screen shots can be found in the Policy Appendices section of this policy. Also please reference the USG Business Procedures Manual Section 6.0 for more information regarding documentation requirements for the Accounts Payable function. A link to this manual is found under Related Information.
